

NAME: DEVANAND P C

REG.NO.: 25EC433

EXPERIMENT-8- Write and execute a Linux shell script to automate basic file management tasks.

AIM: To write and execute a Linux shell script to automate basic file management tasks such as creating directories, creating files, copying, moving, deleting files, and displaying file lists.

PROCEDURE:

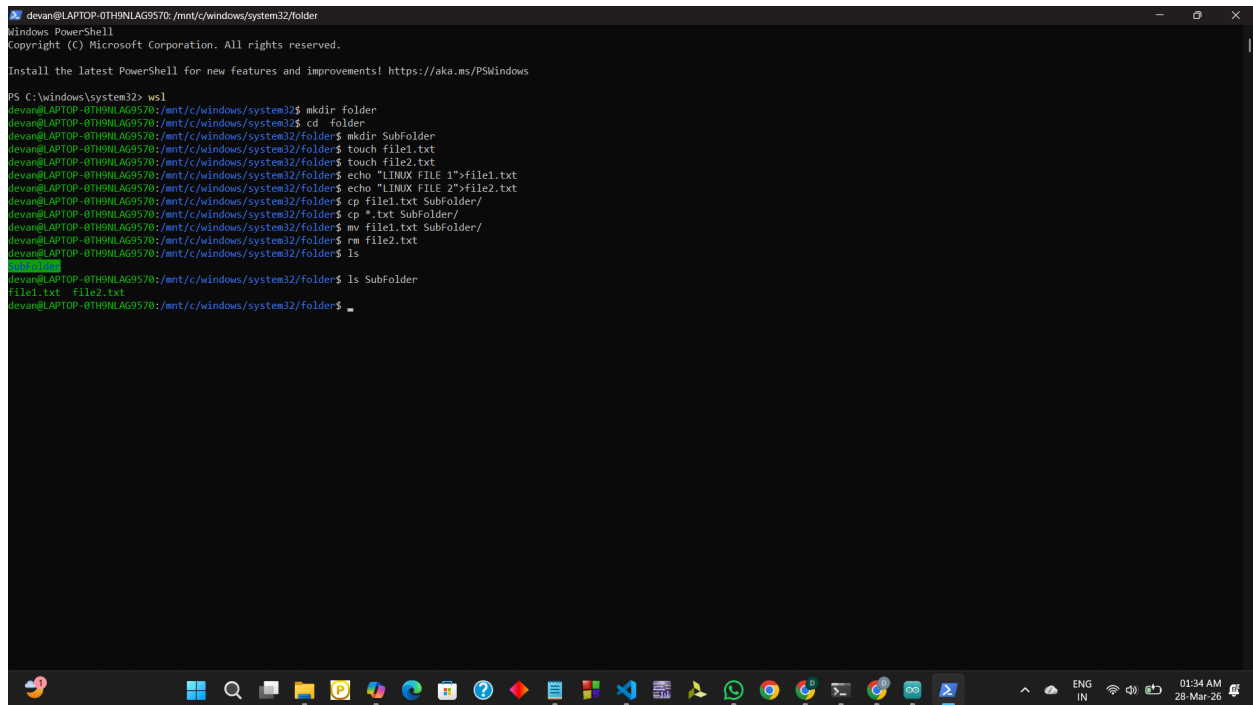

1. Open the Linux terminal.
2. Create a main directory using `mkdir ADPfolder`.
3. Navigate into the directory using `cd ADPfolder`.
4. Create a subdirectory using `mkdir adpsubfolder`.
5. Create sample files using `touch file1.txt file2.txt`.
6. Add content to files using `echo`.
7. Copy files to the subdirectory using `cp`.
8. Move a file to the subdirectory using `mv`.
9. Delete a file using `rm`.
10. Display the list of files using `ls`.
11. Create a shell script file using `nano script.sh`.
12. Save and give execute permission using `chmod +x script.sh`.
13. Run the script using `./script.sh`.

PROGRAM CODE:

```
#!/bin/bash
```

```
mkdir ADPfolder
cd ADPfolder
mkdir adpsubfolder
touch file1.txt file2.txt
echo "This is file 1" > file1.txt
echo "This is file 2" > file2.txt
cp file1.txt adpsubfolder/
cp *.txt adpsubfolder/
mv file2.adpsubfolder/
rm file1.txt
echo "Files in ADPfolder:"
ls
echo "Files in adpsubFolder:"
ls adpsubfolder
```

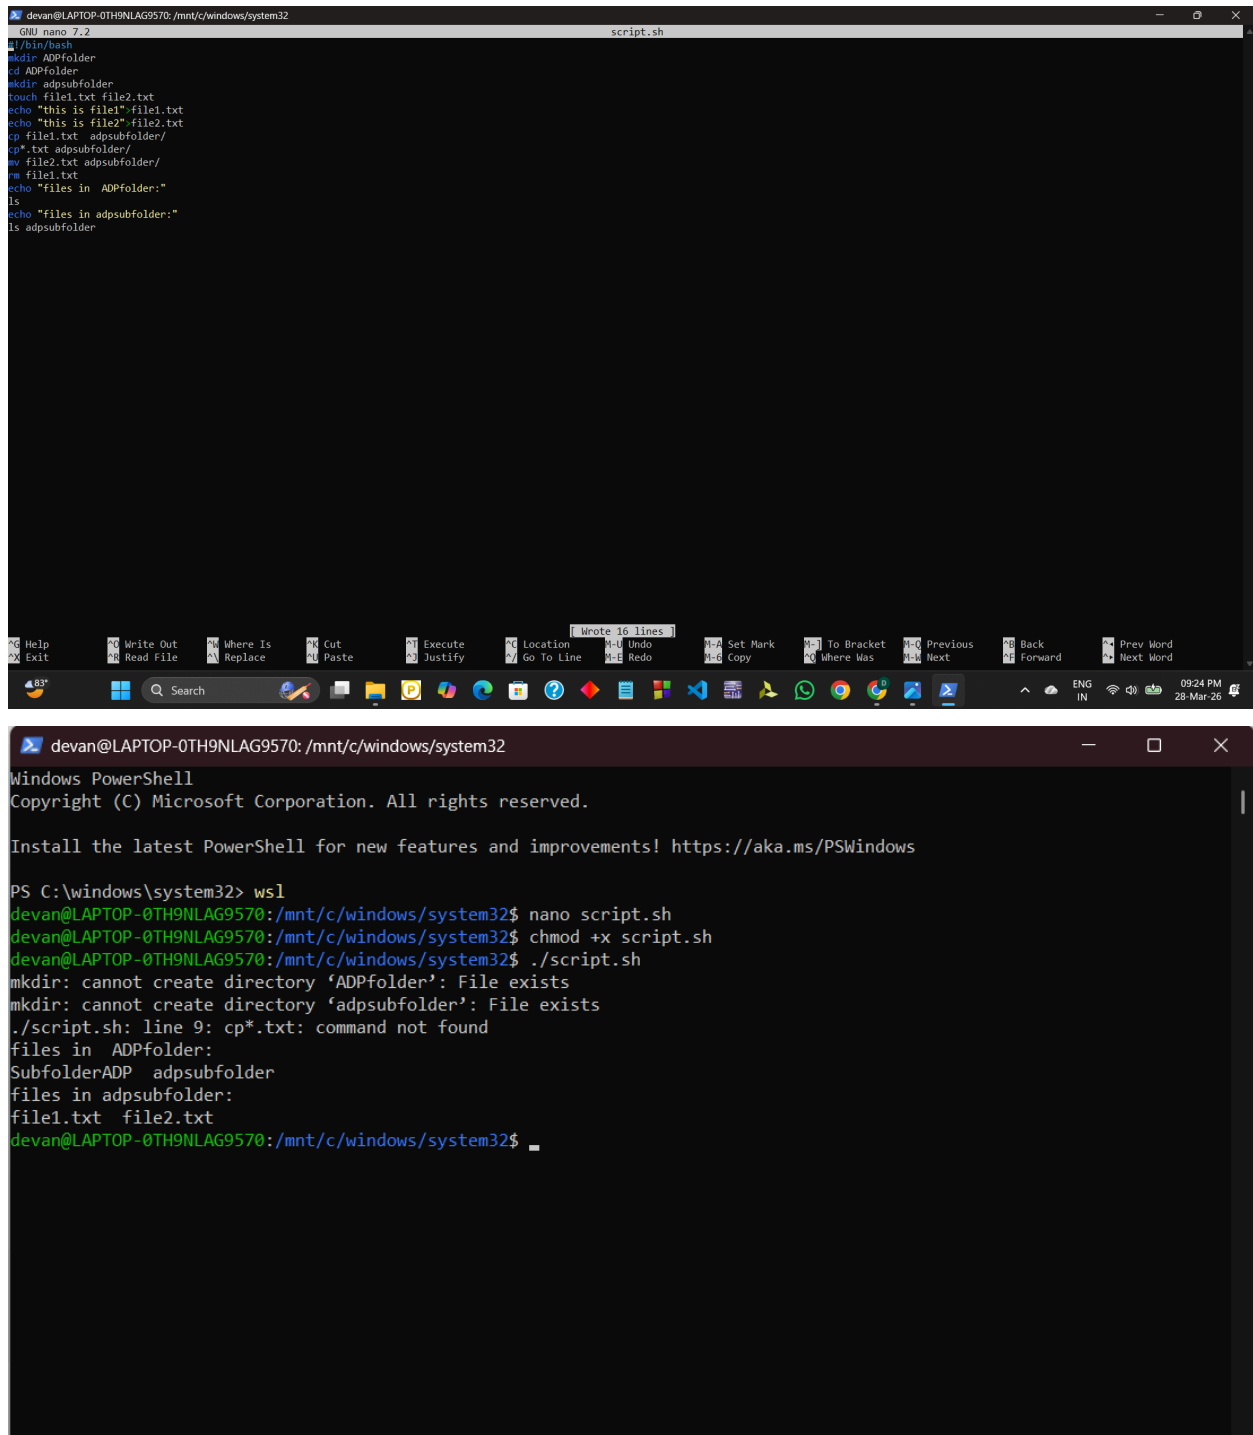

OUTPUT:

```
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder

PS C:\windows\system32> wsl
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32$ mkdir folder
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32$ cd folder
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ mkdir SubFolder
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ touch file1.txt
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ touch file2.txt
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ echo "LINUX FILE 1">file1.txt
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ echo "LINUX FILE 2">file2.txt
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ cp file1.txt SubFolder/
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ cp *.txt SubFolder/
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ mv file1.txt SubFolder/
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ rm file2.txt
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ ls
SubFolder
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$ ls SubFolder
file1.txt  file2.txt
devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32/folder$
```

```

devan@LAPTOP-0TH9NLAG9570: /mnt/c/windows/system32
GNU nano 7.2 script.sh
#!/bin/bash
mkdir ADPfolder
cd ADPfolder
mkdir adpsubfolder
touch file1.txt file2.txt
echo "this is file1" >file1.txt
echo "this is file2" >file2.txt
cp file1.txt adpsubfolder/
cp *.txt adpsubfolder/
mv file2.txt adpsubfolder/
rm file1.txt
echo "files in ADPfolder:"
ls
echo "files in adpsubfolder:"
ls adpsubfolder

```

```

PS C:\windows\system32> wsl
devan@LAPTOP-0TH9NLAG9570:/mnt/c/windows/system32$ nano script.sh
devan@LAPTOP-0TH9NLAG9570:/mnt/c/windows/system32$ chmod +x script.sh
devan@LAPTOP-0TH9NLAG9570:/mnt/c/windows/system32$ ./script.sh
mkdir: cannot create directory 'ADPfolder': File exists
mkdir: cannot create directory 'adpsubfolder': File exists
./script.sh: line 9: cp*.txt: command not found
files in ADPfolder:
SubfolderADP  adpsubfolder
files in adpsubfolder:
file1.txt  file2.txt
devan@LAPTOP-0TH9NLAG9570:/mnt/c/windows/system32$

```

RESULT:

The Linux shell script was successfully executed, and file management tasks such as creating directories, creating files, copying, moving, deleting, and displaying file lists were performed correctly.
